ENTREPRENEURSHIP CERTIFICATE

The 9-credit Certificate of Entrepreneurship is comprised of two highly interactive and experiential courses.

These two courses allow students to form multidisciplinary teams and are charged with developing market-focused and solutions-oriented responses to real-world economic and social problems. Teams work with instructors and expert mentors while taking a deep dive into the business modeling and validation process. In the final course, students learn how to market and sell their idea, product, business or nonprofit.

Eligibility Criteria: The Certificate of Entrepreneurship is open to any undergraduate student of any major with the exception of students in the Business Administration Entrepreneurship concentration or the Entrepreneurship Minor.
