

LINGUISTICS MINOR

The **Minor in Linguistics** offers students a comprehensive introduction to the scientific study of language. Through a combination of theoretical inquiry and practical

application, students explore the structure and use of human language. Core courses cover fundamental topics such as phonetics, phonology, syntax, and semantics,

providing a solid foundation for understanding linguistic principles.

With elective options ranging from computational linguistics to second language acquisition, students can tailor their minor to align with their interests and career goals. This minor enhances critical thinking skills, analytical abilities, and cross-cultural understanding, preparing students for diverse career paths in fields such as communication, education, technology, as well as clinical applications such as speech language pathology.
